REVOLVE

Swedish rock trio **Revolve** is back. With their new self-titled album "**Revolve**" we get to meet a band who have developed but without losing touch with their roots. Ear splitting rock songs with tempo and attitude are combined with ballads in classic Rock N' Roll tradition. With melodies and dynamism in focus, **Nils Tengvar**, **Joel Djerf** and **Jarkko Kyriäinen** are completely proficient in the art of being an explosive Hard Rockband without forgetting about the importance and integrity of their songwriting.

For the recording of the new album, released on Screaming Records Aug 31, the band once and again locked themselves away in well-renowned **Music A Matic Studios** in Gothenburg. The album have been produced together with the experienced **Michael Nilsson** (**The Hellcopters**, **Kendolls**, **The Fume**, **Movements m.fl.**) whilst mastered by **Stefan Helleblad** (**Within Temptation**, **The Ark**, **Delain**, **Mooncoloured Hounds m.fl.**).

Since the highly appreciated release of the debut album "**Burning Money**" in 2009 the band have been touring Scandinavia and at the same time diligently working on the new material. Despite setbacks and upward slopes, the trio have always faced all kinds of challenges with determination and style. With their heavy, aggressive and melodic rock, **Revolve** stands above the rest ready to deliver the best and most powerful rock of 2013.
